

Exhibition and Sponsorship Opportunities

CDANZ – Career Development Association of New Zealand, in partnership with AUT School of Clinical Studies is proud to present the NZ Occupational Rehabilitation Conference 2019.

This biennial event draws together the multidisciplinary professionals delivering vocational rehabilitation programmes through ACC, Ministry of Social Development, community based and private providers.

NZORC19 is a one day professional development and networking event designed to showcase best practice and connect professionals for discussion and reflection on their work, towards best possible client outcomes.

NZORC has been held twice before attracting 80-100 attendees. It is a wonderful opportunity for suppliers and providers working in the field to showcase their goods and services to a select and targeted audience. Attendees in previous years have included vocational consultants, occupational therapists, physiotherapists, occupational physicians, nurses and other industry stakeholders.
